EFFECTIVE AS OF OCTOBER 20, 2026

Antithesis Platform Tutorial Terms

These Antithesis Platform Tutorial Terms (the "Terms") govern the individual user's ("User") access to Antithesis Operations, LLC's ("Antithesis") free online tutorial. By accepting these Terms or accessing the Tutorial, User agrees to them; otherwise User may not use the Tutorial.

1. Definitions.

"GitHub Account" means an authorized, valid GitHub account used for the Tutorial. "Platform" means Antithesis's proprietary autonomous software-testing platform and underlying technology. "Tutorial" means limited access to selected Platform functionality in a shared Antithesis tenant, using only Antithesis-provided software, code, images, configurations, materials and documentation ("Tutorial Content") and permitted test parameters. "Technology" means technology used to provide the Platform and Tutorial, including updates.

2. Eligibility and Accounts.

User must be an individual at least 18 or the local age of majority, have legal capacity and a GitHub Account, and participate only for personal evaluation and learning. User must not access the Tutorial through bots, scripts, shared or false identities. User will use only the GitHub Account identified at signup, secure its credentials, remain responsible for their use, promptly report unauthorized access, and not share, sell, transfer or permit another person to use Tutorial access. User may not participate if barred by U.S. export, sanctions or trade laws, located in a comprehensively sanctioned jurisdiction, a restricted party (or owned, controlled by or acting for one), or an Antithesis competitor (or acting for one), and may not use the Tutorial for prohibited end uses, competitive intelligence, benchmarking or a competing offering, all of which is subject to Antithesis verification in its sole discretion. Antithesis reserves the right to, before or during access, require User to verify identity, employer, and eligibility, and may deny, limit, or revoke access based on the results or otherwise in its discretion.

3. Tutorial Access and Use.

Antithesis grants User a revocable, nonexclusive, nontransferable, non-sublicensable right during the access period to use the Tutorial only for personal evaluation and learning. User may adjust only available parameters and may not introduce other software, code, images, data or content. User will not sell or provide access; copy, modify, create derivatives, decompile, disassemble, reverse engineer or attempt to discover source code, structure, ideas or algorithms; disrupt service, bypass controls or access unavailable resources; use unauthorized automation; remove notices; benchmark or build a competing offering; act unlawfully, maliciously, fraudulently or without authorization; identify, contact,

impersonate, harass or interfere with another user; or submit sensitive or personal information. Access to the Tutorial may use GitHub integration, Antithesis's application or API and a GitHub Action; no direct image-registry access is provided. Antithesis may change technical parameters or discontinue the free Tutorial without support or service levels. Neither party is obligated to enter any further agreement or business relationship. All ungranted rights are reserved to Antithesis.

4. Licenses and Ownership.

Antithesis owns the Platform, Tutorial, Tutorial Content, Technology, documentation, outputs and related improvements and derivatives. Except for Section 3, no license or ownership passes to User. User may use outputs only for personal evaluation and learning, not a competing offering. User grants Antithesis a nonexclusive, worldwide, royalty-free, perpetual, irrevocable, transferable and sublicensable license to use feedback for any purpose without compensation, obligation or attribution.

5. Shared Environment and Information.

The Tutorial is shared and nonconfidential; users may see each other's GitHub usernames, parameters, activity and outputs. User will not provide personal, confidential, proprietary, regulated or sensitive information, and Antithesis is not responsible for voluntary disclosures or others' access to visible information. Antithesis may monitor, record, review and retain activity to operate, secure, support, improve and market its offerings and enforce these Terms.

6. Access Period and Termination.

Access begins when enabled and continues as Antithesis determines. User may stop, and Antithesis may limit, suspend or terminate access at any time, for any reason, with or without notice. User must then stop using the Tutorial and related credentials and materials. Sections 1, 3–5 and 7–11 survive, except that User's access right ends.

7. User Warranties.

User represents, warrants and covenants that User satisfies Section 2, provides accurate current information, is authorized to use the GitHub Account, will comply with law and these Terms, and will introduce only expressly permitted parameters.

8. Disclaimer.

THE PLATFORM, TUTORIAL, TUTORIAL CONTENT AND OUTPUTS ARE PROVIDED "AS IS," "AS AVAILABLE" AND "WITH ALL FAULTS." TO THE MAXIMUM LAWFUL EXTENT, ANTITHESIS DISCLAIMS

ALL EXPRESS, IMPLIED AND STATUTORY WARRANTIES, INCLUDING MERCHANTABILITY, FITNESS, TITLE, NONINFRINGEMENT, ACCURACY, SECURITY AND UNINTERRUPTED OPERATION, AND DOES NOT WARRANT RESULTS, REQUIREMENT SATISFACTION, PRESERVATION OR AVAILABILITY. USE IS AT USER'S RISK.

9. Limitation of Liability.

TO THE MAXIMUM LAWFUL EXTENT, ANTITHESIS AND ITS AFFILIATES, LICENSORS, SERVICE PROVIDERS AND PERSONNEL ARE NOT LIABLE FOR INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL, EXEMPLARY OR PUNITIVE DAMAGES, OR LOST PROFITS, REVENUE, BUSINESS, GOODWILL OR DATA, RELATED TO THESE TERMS OR THE TUTORIAL, EVEN IF ADVISED OF THEIR POSSIBILITY. THEIR AGGREGATE LIABILITY WILL NOT EXCEED $100. THESE LIMITS APPLY REGARDLESS OF ACTION OR FAILURE OF ESSENTIAL PURPOSE, BUT NOT WHERE UNLAWFUL.

10. Indemnification; Injunctive Relief.

User will defend, indemnify and hold harmless Antithesis, its affiliates, licensors, service providers and personnel from third-party claims and losses, including reasonable attorneys' fees, arising from User's unauthorized use, legal violation, introduced or provided content, or breach. Antithesis will give prompt notice and reasonable cooperation. Antithesis shall control the defense and settlement. User acknowledges that breach of Sections 2 through 4 may cause Antithesis irreparable harm for which damages would be inadequate, and that Antithesis may seek injunctive or other equitable relief without posting bond, in addition to other remedies.

11. General.

The parties have no partnership, agency, employment, fiduciary or similar relationship. User may not assign these Terms or access to the Tutorial; Antithesis may assign these Terms. Virginia law governs, excluding conflicts rules. Except intellectual-property claims and injunctive relief, disputes will be finally resolved by one arbitrator in Fairfax County, Virginia under American Arbitration Association commercial rules. To the maximum extent permitted by law: proceedings will be individual, not class, consolidated or representative; and the prevailing party will be entitled to recover reasonable attorneys' fees and costs. Antithesis may give notice through the Tutorial, signup interface or GitHub-account email. These Terms are the entire Tutorial agreement. Antithesis may update them on notice to User; continued access after effectiveness accepts the update of these Terms. Waivers must be written and specific; invalid provisions are enforced to the lawful maximum without affecting the rest; headings are for convenience.

By clicking to accept these Terms or accessing the Tutorial, User confirms that User has read, understands and agrees to these Terms.
